

Introducing
TRI-WAVE MD

Our most
powerful
design yet

● DERMALUX

Light years ahead

Design led

Looking **sleek and modern**, the Tri-Wave MD has been designed to compliment your clinic environment.

The monolithic structure provides a clean aesthetic.

Winner of the European Product Design Awards 2024.

High quality premium materials. Body panels are designed to be scratch resistant and withstand heavy use and cleaning materials.

Safe

Developed within an ISO 13485 QMS and tested to meet the requirements of EN 60601.

Emergency stop feature for **patient safety**.

The system has various safety cut-outs in place such as thermal and current overload, designed with a series of warning messages to inform the operator and protect the patient.

Pushing the boundaries of medical LED to the next level

Powerful

The most powerful offering in our range, the device utilises a **large, adjustable, 4-pod head** to deliver treatments to **broad areas of the skin**.

Capable of delivering up to **240 j/cm2 in a single treatment**. Each panel can output **3 clinically proven wavelengths**, independently or collectively.

Patent-pending LED cooling system that allows the LEDs to operate more efficiently and have a **longer lifespan without degradation**.

The output heads utilise centrifugal fans that direct an air current over the treatment area, dissipating heat on the skin surface, **enhancing patient comfort**.

Versatile

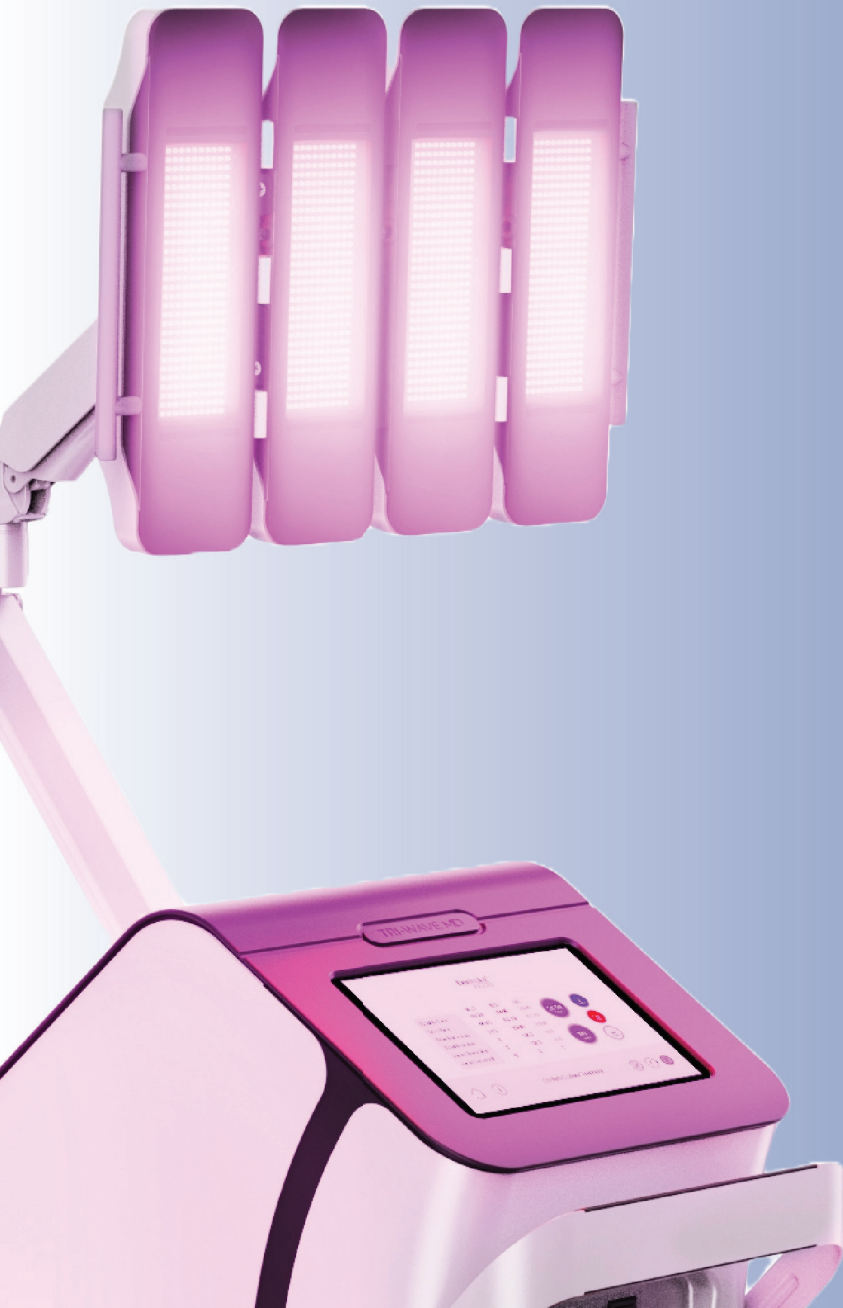

Can be used to treat **face and body**.

Fully **custom user-interface** that allows for intuitive programming of the treatment or **selection of pre-sets**.

Customised light energy treatment by selecting pre-set or custom configurations and programming specific doses of energy.

A custom articulating arm that offers **maximum adjustability** and versatility in small spaces.

Designed with mobility in mind, castors and handles allow for fluid movement while the base has been rigorously tested for stability.

Indications for use include:

Skin rejuvenation • Pigmentation

Acne • Redness

Inflammation • Psoriasis

Pain • Healing

Also certified to deliver photodynamic therapy
(PDT) for non-melanoma skin cancers.
